# NUST TIC - PIONEERING TECHNOLOGY INCUBATION IN PAKISTAN

## Incubation Concept

'Incubation' promotes entrepreneurship by helping start-up businesses become successful; a concept best known as 'business incubation.' Taking on the traditional role of an

incubation facility or an 'Incubator,' TIC provides its client firms a business-conducive environment with necessary strategic and operational support services. This reduces the amount of initial investment to set up a business venture and increases the success potential of a business.

## Technology Incubation Centre

Technology Incubation Centre (TIC) inaugurated in September 2004, is the first technology incubator of Pakistan established in academia. TIC mission is to attract and nurture technology based start-

up companies transforming them into commercially viable enterprises. TIC helps entrepreneurs with brilliant ideas to establish their own businesses within TIC premises. The success of these companies (also known as incubatee) is the success of TIC itself thus making it an absolutely personal interest for TIC.

The resident companies of TIC operate in three industrial sectors namely Information & Communication Technologies (ICT), Engineering, and Technology-based Services.

# WHAT TIC OFFERS?

## Enterprise Development:

Business Advisory Services, Trainings, Technical Consultancy Services, Networking, Identification/Access to State-of-the-Art Labs, Marketing Support
